

- Geochemical evaluation of petroleum systems in Norwegian North Sea Quadrant 25
- Extensive source rock, maturity & fluid data – nearly 4000 samples from >90 wells – includes 48 oils analysed by APT
- Petroleum potential assessment of all stratigraphic units from Permian to Late Cretaceous – with molecular & isotopic characterization of main units
- Detailed investigation of hydrocarbon accumulations – e.g. PVT properties, biodegradation & reservoir compartmentalization
- Full data tables & chromatograms – can be supplemented with client's data

APT is a commercial company offering high quality analyses and consultancy services to the oil industry within the fields of petroleum geochemistry, biostratigraphy and production monitoring
