

The Trøndelag Platform: a petroleum province?

Comprehensive evaluation of geochemical data from 6 wells on the Trøndelag Platform and neighbouring Helgeland Basin – a petroleum systems overview

- extensive source rock & maturity data compiled from open-file NPD reports
- supplementary new VR analyses by APT
- APT analysis of the single oil show in the area – well 6610/7-2
- evaluation of reservoir core extracts
- full data tables & chromatograms – can be supplemented with client's data

APT is a commercial company offering high quality analyses and consultancy services to the oil industry within the fields of petroleum geochemistry, biostratigraphy and production monitoring
