Well 7220/6-1 (Obelix) – a Key Well for Future Exploration of the Loppa High?

- Although this well did not prove commercial petroleum, residual hydrocarbons were encountered
- It is a key well in understanding the likely success of further exploration of the Loppa High
- APT has supplemented the limited geochemical information available from NPD by new sampling
- New analyses of 22 cuttings, 19 core chip samples and MDT oil
- Incorporation of existing data – gas, vitrinite reflectance, shows & potential source rock extracts
- Evaluation of combined data sets

APT is a commercial company offering high quality analyses and consultancy services to the oil industry within the fields of petroleum geochemistry, biostratigraphy and production monitoring
