

Implications of oil variability along eastern edge of Central Graben for exploration risk in marginal areas

- Geochemical evaluation of petroleum systems in Egersund Basin & along Brynhild–Trym trend
- All new APT analyses for 22 oils from 16 wells – GC of whole oil & saturates, GC-MS, GC-MS-MS, C isotopes, CSIA & latroscan
- Inferences for sources (including age diagnostic biomarkers), alteration, maturation variation, migration (including benzocarbazoles) and compositional variations within & between fields
- Full data tables & chromatograms – can be supplemented with client's data

APT is a commercial company offering high quality analyses and consultancy services to the oil industry within the fields of petroleum geochemistry, biostratigraphy and production monitoring
