Oil populations and migration along the Danish-Norwegian border

- Geochemical evaluation of test oils & gases, headspace gas and reservoir extracts from some 27 straddling the boundary of the Danish & Norwegian sector of the North Sea, including the Siri Fairway
- Data compiled from APT analyses and geochemical reports available from NPD or licensed from GEUS
- Full data tables of APT & NPD reported data plus APT chromatograms – GEUS data subject to licensing agreement
- Oils & reservoir extracts correlated statistically using GC, GC-MS & and bulk C isotopic data, together with inferences for likely sources & migration routes
- Molecular & isotopic compositions of gases assessed
- Mandal, Farsund & Bryne source rock evaluation from TOC & Rock-Eval data

APT is a commercial company offering high quality analyses and consultancy services to the oil industry within the fields of petroleum geochemistry, biostratigraphy and production monitoring
