Oil populations in the high temperature - high pressure areas offshore mid Norway

Geochemical investigation of genetic relationships of 95 oils & condensates from 32 wells in the HTHP zone:

- GC, GC-MS & C isotopic data mostly from APT analyses to minimize interlab variability
- with emphasis on Lavrans, Kristin, Ragnfrid, Erlend, Trestakk, Tyrihans, Victoria, Lange & Smørbukk fields
- statistical analysis of oil-oil correlation allowing for influence of maturity & alteration
- potential sources suggested, aided by age-specific biomarkers
- full data tables & chromatograms – can be supplemented with client's data

APT is a commercial company offering high quality analyses and consultancy services to the oil industry within the fields of petroleum geochemistry, biostratigraphy and production monitoring
