

# Oil populations of the Draugen area

Genetic relationship of 39 oils & condensates, plus 55 reservoir core extracts from 22 wells in the Draugen area, including Mikkel, Njord and Tyrihans fields

- GC, GC-MS and C isotopic data mostly from APT analyses
- statistical oil-oil correlation, evaluation of potential sources in light of age-related biomarkers
- assessment of maturity & post-depositional alteration
- benzocarbazole migration distance indications
- Ifull data tables & chromatograms – can be supplemented with client's data

APT is a commercial company offering high quality analyses and consultancy services to the oil industry within the fields of petroleum geochemistry, biostratigraphy and production monitoring
